

MIDDLE HIRAFU CREEKSIDE LAND LOT B

Niseko Realty are pleased to offer this generous sized parcel of land located in the heart of the Hirafu Village. The land is a simple stroll from all amenities along with the towns main shuttle bus. For the extra motivated skier it is a simple walk up to the Gondola in the morning on a cleared footpath.

The small boutique land subdivision consists of 4 housing sites along with a larger site on the end for a small boutique hotel or stunning set of town houses. The land has a small creek that borders the North East boundary which flows down to the Shiribetsu River. This makes a excellent feature with which to design your home around taking in the sounds both in winter and summer of the flowing creek.

The land also has had extensive work done by architectural firm Florian Busch Architects who can also help with designing & delivering your dream chalet. Its unique topography allows all blocks to take in significant views of Mt Yotei and Hirafu ski runs.

Middle Village land is harder and harder to find and certainly land with this view protection is very rare.
